-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank 5698019 or Germany 1441336 in view of Chemical Abstracts 120 (M.Y. Shareef et al).

See previous rejection for the manner in which the art is applied.

Response to Arguments

Applicant's arguments filed 30 July 2003 and have been fully considered but they are not persuasive.

It is argued that Frank does not have an absolute crystal size of less than 10 microns. This does not appear to be true. But if it is, it is not relevant because the claim makes no mention of "absolute" crystal size. The same applies to the arguments regarding the German patent.

It is further argued that Frank does not enable one to make the invention. Frank is a valid patent. If it was not enabled, then there would be no patent. Therefore Frank is enabled. However, if Applicant has any evidence/rationale as to why Frank is not enabled, such will be considered.

As to the allegation that the German patent does not enable one to make and use the invention – namely the small particles. The arguments are not convincing. Most notably, at the bottom of page 9 of the specification – applicant states that one of ordinary skill knows how to isolate the small diameter particles. Clearly one of ordinary skill can get whatever sized particle he desires.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
